ADVISORY ACTION

The applicant argues that the combination of Fabris and Parker is improper since Fabris teaches a touch screen and Parker teaches a remote controller. However, the examiner strongly disagrees. The touch screen of Fabris is in fact a remote controller for remotely operating the cameras in the system. Although it is not the same type of remote controller in which the applicant discloses, it does control the camera. The Parker reference is used to show another type of remote controller which is moveable independently and also controls the tracking, pan, tilt, etc. By modifying Fabris touch screen with a remote controller of Parker, the camera may be individually controlled to a predetermined position. Therefore, the rejections are maintained.
